

# Liquid Anti-Icing / De-Icing Equipment for Airports

## Large Self-Loading Sprayers

### SYSTEM FEATURES:

- Two 900 gallon "twin" tanks on 1,800 gallon system (with double suction) fits tandem axle dump trucks.
- 1,065 gallon tank system fits single axle dump trucks.
- Heavy-duty self-loading steel leg frame (Front legs rotate up as truck backs up to load unit; front wheels provide smooth roll-in).
- Individual telescoping rear legs for "bind-free" lifting.
- Adjustable height **stainless steel** boom with high-flow nozzles (spray 1, 2 or 3 lanes at once). Solid Stream nozzles also included for deicing center lane.
- High flow hydraulic-drive pump; engine-drive pumps also available.
- **Raven DCS 400 or 410 Automatic Rate Control System.** Pre-programmable with up to six or ten application rates.
- Precise application rate in Gals/Lane-Mile; automatically maintains preset rate regardless of speed changes or the number of lanes being sprayed.
- Plumbed with polypropylene **flanged** fittings, drain/fill valve, strainer and check valves for quick & easy maintenance.
- Also great for dust control, watering subgrades & other uses.
- **Other variations and models available, including 3,100 & 4,000 gallon systems.**

DU 1A054  
(1065 Gallons)  
or DU 1A045  
(1800 Gallons)

Shown here with standard stainless boom:  
sprays 3 sections totaling 35' wide

Shown with optional folding truss boom:  
great for spraying full 35' or 45' widths  
with solid stream or fan nozzles located  
every 6" along entire width of boom.  
Boom includes "break-away" protection  
feature. Available with standard manual  
or optional hydraulic folding controls.

DU 1A054A (1065 Gallons) or  
DU 1A045A (1800 Gallons)
