

Unique Kennel Cleaning System Can Dramatically Reduce Parvo!

"The deadly puppy disease, Parvo, has nearly been eliminated from our kennels." - Dave Carbaugh

"I recommend this system to everyone who tours our facility."

Dultmeier high pressure pump stations inside the Nebraska Humane Society (Omaha, Nebraska) maximize kennel cleaning effectiveness and speed.

"Dultmeier's high-pressure cleaning system is one of the main features that sets our shelter apart from most others in the country. Before the Dultmeier high pressure cleaning system was installed, we averaged hundreds of cases of Parvo per year. Last year we had fewer than 20 reported cases and most of these came into our facility already infected. I can't say enough about the importance of our cleaning system, from the ease of use to the dramatic improvement in animal health. I recommend this system to everyone who tours our facility."

- Dave Carbaugh
V.P. & Chief Operating Officer, Nebraska Humane Society
